

# Border Audit

SECURITY & COMPLIANCE SERVICES

Wall Street Journal reports

## "HACKERS SHIFT ATTACKS TO SMALL FIRMS"

(WSJ, July 21 2011)

## WHAT IS BORDER AUDIT FOR BUSINESS?

Everything a business needs to identify information technology risks and ensure compliance. Border Audit automates the process, providing:

- network discovery and mapping
- assets prioritization
- vulnerability assessment reporting
- remediation tracking

Policy compliance features enable businesses to audit, enforce, and document compliance with internal security policies and external regulations.

## BORDER AUDIT FOR BUSINESS INCLUDES:

### VULNERABILITY MANAGEMENT

- Quickly Deployable, Scalable Security Risk and Vulnerability Management

Other Services Available:

### PCI COMPLIANCE

- Automated PCI Compliance Validation for Merchants

### SECURE SEAL

- Website Authentication

## BENEFITS:

### KNOW WHAT YOU DON'T KNOW

- Knowledge is power
- Before you can mitigate risk, you have to know it exists
- Rapidly identify, visualize and organize network assets into Business Units and Asset Groups
- Resume control of your IT assets

### COMPREHENSIVE REPORTING

- Gives management insight into vulnerabilities
- Recommended fixes for known vulnerabilities

### PEACE OF MIND

- Proactive approach to IT security
- Prudent man litigation defense

Optional Benefits:

### COMPLIANCE

- Cost effective professional IT security expertise at your disposal to assist with industry compliance

### WEBSITE PROTECTION

- Identify threats before they impact your website
- Technology backed by human intervention to maximize effectiveness
- Proactive alerting of threat attempts
- Removes the target from your back
